

# KAPIL KHATRI

## FULL-STACK DEVELOPER

kapilkhatri3603@gmail.com | +91-9426610361 | [Github](#) [Linkedin](#) [Portfolio](#)

## Work Experience

### SOFTWARE ENGINEER INTERN

Feb'24 - Aug'24

BuiltDesign, Nagpur

- Developed and maintained a freelancing marketplace for architects using **Angular** for the front-end and **NestJS** for the back-end, enhancing user experience and platform reliability.
- Collaborated with cross-functional teams in daily standups to translate business requirements into technical specifications, driving the product development lifecycle.
- Optimized application performance and scalability through code refactoring and efficient resource management, preparing the platform for future growth.

## Skills

HTML | CSS | JavaScript | React | Angular | Nodejs | MongoDB | Framer | Redux | Express | Nestjs | Tailwind CSS | Material UI | Git | Github | Problem Solving | C++ | NextJS | NgZorro | Typescript

## Projects

### Whatsapp Clone

[Click-here](#)

- Full-stack application developed using the MERN stack.
- Utilizes Socket.io for real-time communication capabilities.
- State management is handled through Redux.
- Incorporates the Framer Animation library to create engaging animations.

### E-commerce App

[Click-here](#)

- E-commerce application built with the MERN stack (MongoDB, Express.js, React, and Node.js).
- Zustand is used for efficient state management.
- Integrated Razorpay Payment Gateway for secure and seamless transactions.
- Implemented a JWT-based authentication system on the backend for secure user authentication.

### Expense-Tracker App

[Click-here](#)

- Professional full-stack expense tracker application.
- Offers CRUD (Create, Read, Update, Delete) operations for seamless expense tracking.
- Utilizes MongoDB as the database for storing transaction data.
- Implements a secure authentication system based on JSON Web Tokens (JWT) to protect user accounts and data.

### Quiz App

[Click-here](#)

- Fully responsive quiz application developed using React.
- Offers a variety of quiz categories to choose from, providing diverse content.
- Integrates an API to populate the quizzes with multiple-choice questions (MCQs).
- Employs Material UI for elegant and user-friendly styling of the application components.

### NFT Marketplace

[Click-here](#)

- NFT (Non-Fungible Token) marketplace built using Next.js for robust web development.
- Stylish and responsive design achieved with the use of Tailwind CSS for styling.
- Utilizes the Ethers.js library to enable seamless interaction with the Ethereum blockchain, facilitating NFT transactions and management.

## Education

### Shri Labhubhai Trivedi Institute Of Engineering And Technology

2021- present

- Bachelor of Engineering in C.S.E

Rajkot, India

### G.T. Sheth Vidyalaya

2020 - 2021

- H.S.C. (GSEB)

Rajkot, India

### B.S.N. Academy

2018 - 2019

- S.S.C. (CBSE)

Kota, India
